Frankfurt, Hessen - 60437, Germany

OBJECTIVE

Master's student in Computer Science at Philipps-Universität Marburg with prior industry experience at Deloitte as a Senior SmartComm Developer. Skilled in Python, data science, and machine learning, with hands-on project work in NLP and algorithm design. Seeking a role where I can apply my technical expertise and problem-solving skills to build innovative systems that deliver measurable business impact.

Technical Summary: Proficient in Python, PyTorch, Transformers, SentenceTransformers, SQL, MongoDB, NumPy, Pandas, Matplotlib, Scikit-learn; experienced in NLP, data augmentation, and precision-recall optimization.

EXPERIENCE

• The Sparks Foundation

Data Science Intern

Nov 2020

Bangalore, India

- Used specialised analysis tools to determine how business can use data.
- Cleaned and analysed different datasets using NumPy, Pandas, Matplotlib, etc.
- Built predictive ML models on datasets of 50k+ rows, achieving 85%+ accuracy and improving business insights.

• Deloitte USI

Analyst

June 2022 - Aug 2024

Bangalore, India

- Designed and implemented automated document generation solutions using SmartComm (Thunderhead) to optimize communication workflows.
- Collaborated with cross-functional teams to gather and analyze requirements, ensuring alignment with client objectives and business goals.
- Enhanced the efficiency of document generation systems by troubleshooting and resolving performance bottlenecks by 20% compared to baseline.
- Maintained strong communication with clients to understand their requirements, provide solutions, and ensure successful project delivery.
- Actively mentored junior developers in mastering SmartComm tools.

EDUCATION

• Philipps-University Marburg

Master's in Computer Science

Oct 2024 - Present

Marburg, Germany

• Sathyabama Institute of Science and Technology

Bachelor in Engineering - Computer Science

June 2018 - May 2022

Chennai, India

- Grade: 8.61 CGPA

PROJECTS

• Text based Multi Emotion Classifier

Tools: Python, Transformers, PyTorch, Scikit-Learn, SentenceTransformers

2025

 [kaadi2000](#)

- Improved macro F1-score by 10% for multi-label emotion detection by designing a multi-model ensemble (BERT, RoBERTa, DistilBERT, SBERT) with logistic regression meta-learners.
- Built robust data augmentation and class balancing pipeline to handle dataset imbalance (e.g., fear: 1611 samples, anger: 333 samples).
- Developed custom threshold optimization per emotion using precision-recall curves to maximize macro F1.
- Deployed a structured workflow supporting reproducible experiments and external pretrained model loading.

• Algorithm Visualizer

Tools: Python, Data Structures

2021

 [kaadi2000](#)

- Designed and implemented an interactive tool to visually demonstrate various sorting algorithms (e.g., Bubble Sort, Counting Sort, Heap Sort).
- Integrated pathfinding algorithms such as BFS and DFS to showcase real-time traversal logic.
- Helped learners understand algorithm behavior through animated visualizations and performance comparisons.

SKILLS

- **Programming Languages:** Python, C, C++, Java, R
- **Machine Learning:** PyTorch, Transformers, SentenceTransformers, NLP, Data Augmentation, Precision-Recall Analysis
- **Data Science Tools:** NumPy, Pandas, Matplotlib, Scikit-learn
- **Databases:** SQL, MongoDB
- **Version Control:** Git

HONORS AND AWARDS

- **Applause** *Aug 2023*
Deloitte USI
 - Recognized among top 0.5% performers company-wide for outstanding project delivery and innovation.

CERTIFICATIONS

- **Foundations of Data Science - One Fourth Labs** *Dec 2020*
- **Data Science Foundations Specialist** *Jan 2020*
- **Open Source Software Development, Linux and Git** *Dec 2019*
- **Databases and SQL for Data Science** *Jan 2020*
